RECOVERYTALENT

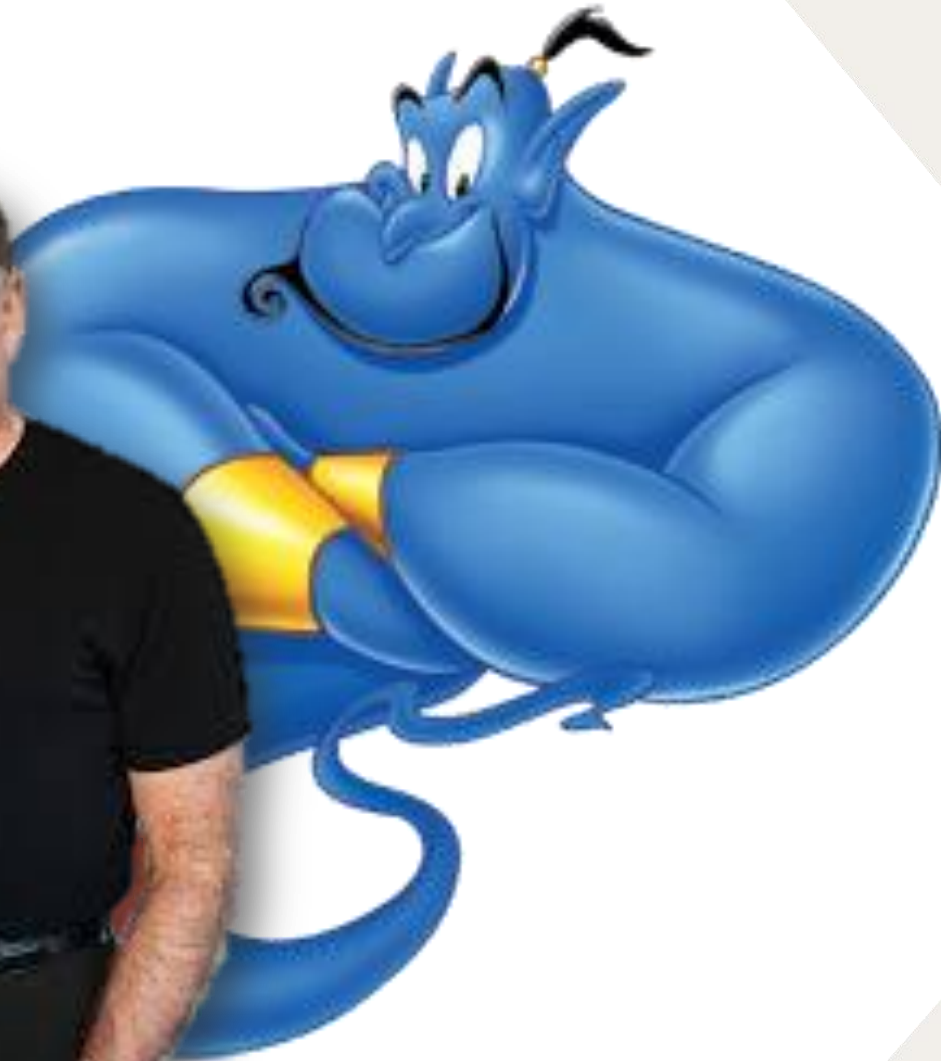

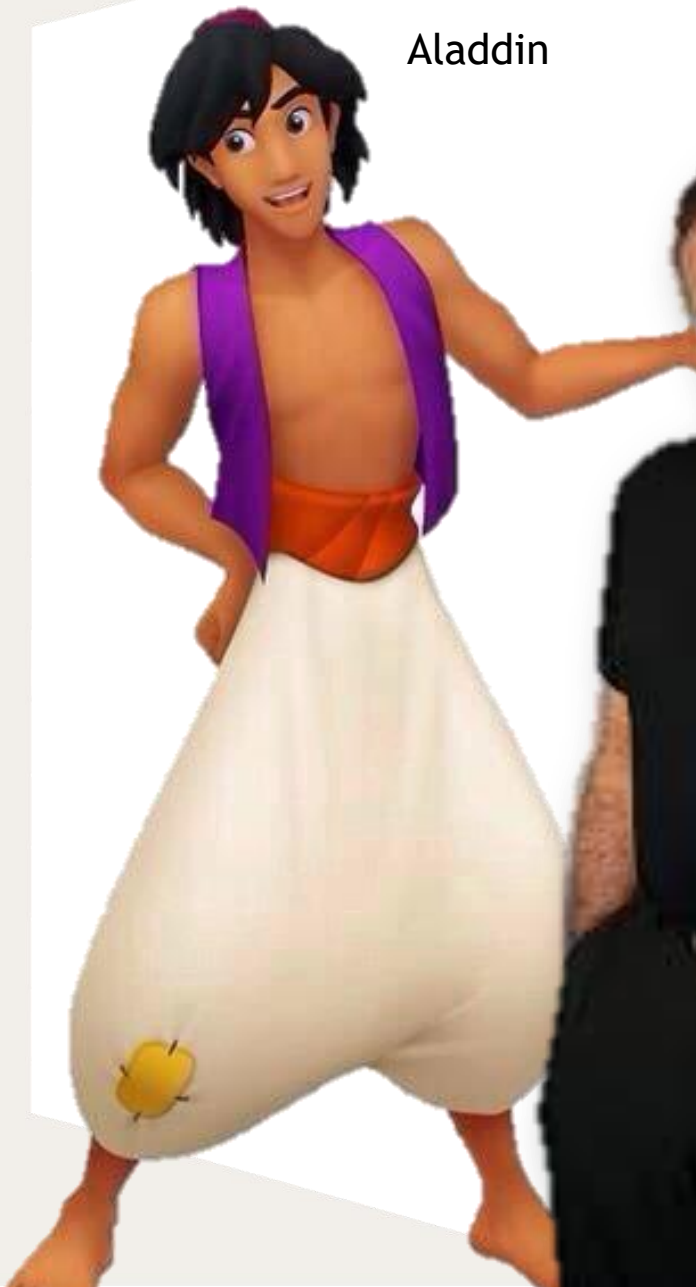

With RecoveryTalent I aim to make visible, develop and implement the knowledge and competences arising from experience with disruptive life situations. Knowledge from experience (tacit knowledge) we feel should be regarded as a valuable source of knowledge, deserving its own place next to regular (medical) knowledge - or as a valuable supplement.

In practice this means that we:

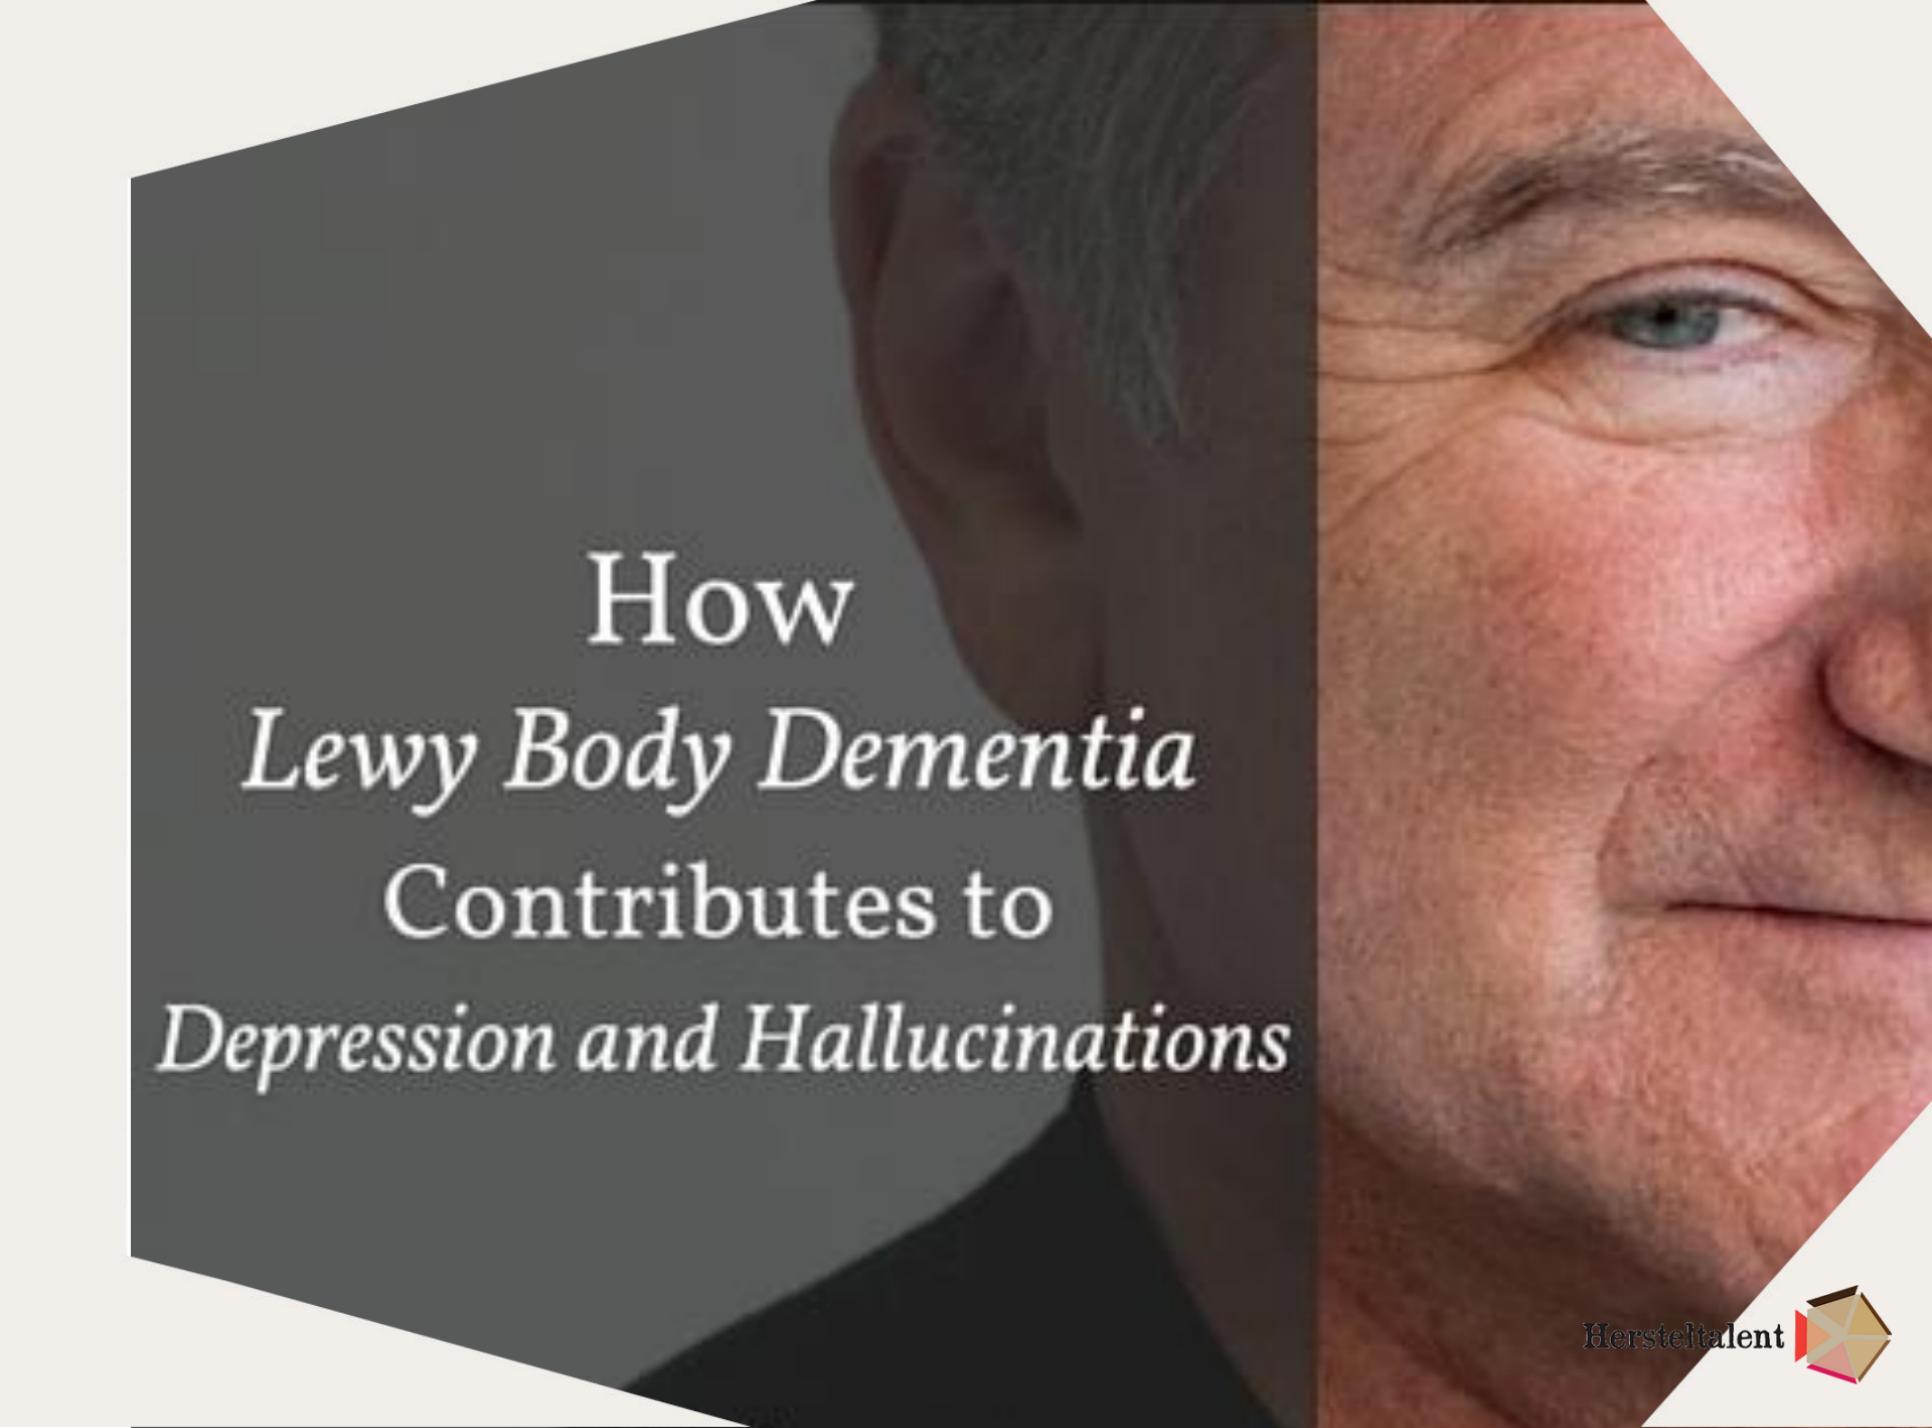

- Develop methods and procedures based on knowledge from experience
- Develop and professionalize the implementation of knowledge from experience
- Make knowledge from experience easily accessible
